

VINAY K R

Full Stack Developer | Angular · React · Node.js · Go · .NET Core · REST APIs

Bengaluru, India | +91-7975893210 | vinayravindranatha@gmail.com

LinkedIn: linkedin.com/in/vi-naykr | GitHub: github.com/vi-nayKR | Portfolio: me.vinaykr.workers.dev

SUMMARY

Full Stack Developer with 3+ years of experience building production-grade web applications across FinTech, Web3 custody, and high-throughput product ecosystems. Strong in enterprise Angular, React, Node.js/Express, Go, and .NET Core, with hands-on ownership of secure REST APIs, real-time WebSocket services, RBAC, 2FA step-up authentication, PostgreSQL/PostGIS, Redis, Docker, and CI/CD pipelines. Comfortable taking features end-to-end from UI architecture and API design to testing, deployment, and production debugging.

TECHNICAL SKILLS

- **Frontend:** Angular, RxJS, Angular Material, TypeScript, React, Tailwind CSS, JavaScript, HTML5, CSS3, responsive and component-based UI design
- **Backend:** Node.js, Express.js, Go, Chi, C#, ASP.NET Core, Java, Spring Boot, REST API design, WebSockets, Microservices
- **Databases & Caching:** PostgreSQL/PostGIS, SQL Server, MySQL, MongoDB, Redis, MinIO Object Storage
- **Auth & Security:** Auth0, OAuth2, RBAC, JWT/RS256, refresh-token rotation, 2FA/step-up auth, cryptographic signatures, nonce validation
- **DevOps & Tools:** Docker, Docker Compose, GitHub Actions, Jenkins, Git, Nginx, Cloudflare Tunnels, AWS EC2/S3, Swagger/OpenAPI
- **Testing:** Cypress E2E, unit testing, integration testing, API testing, Agile/Scrum delivery

EXPERIENCE

Software Engineer - Full Stack | Liminal Custody (First Answer India Services Pvt Ltd) Nov 2025 - Mar 2026

- Built Angular modules for Transaction Risk, Travel Rule, and Transfer Policy workflows using RxJS state management, reusable UI patterns, cascading dropdowns, validation states, and beforeunload guards to prevent unsaved configuration loss.
- Developed REST APIs for firewall policy management using Node.js/Express and TypeScript, applying atomic bulk operations and transaction rollbacks to keep concurrent rule updates consistent.
- Designed a multi-tenant RBAC system integrating Auth0 with custom middleware, 2FA step-up authentication, cryptographic signature validation, and nonce-based replay prevention for high-value custody endpoints.
- Built a Redis-backed caching layer for cross-chain swap quotes across Ethereum, Polygon, BSC, and Base, enforcing ownership and quote-expiry validation to reduce unnecessary external API calls.

Senior Associate Software Engineer | Light & Wonder (LNW India Solutions Pvt Ltd) Aug 2023 - Jul 2025

- Developed modular Angular components for a large-scale player-management platform, converting business workflows into reusable screens, forms, and UI components with consistent state handling and API integration.
- Modernized legacy screens into a responsive, component-based Angular architecture, improving maintainability, UI consistency, and developer handoff across Agile teams.
- Built backend Web APIs in C#/.NET Core for a core financial transaction system covering bank account management, voucher redemption, denomination exchange, and check-cashing workflows.
- Built interactive React widgets for slot-machine secondary screens, enabling player-employee interactions such as attendant calls, beverage orders, and reservations with real-time WebSocket communication.
- Engineered an AI-assisted error logging and debugging tool using React and LLM APIs to centralize frontend crash reports and backend telemetry for faster issue triage.
- Created and maintained Cypress end-to-end test coverage for critical UI workflows, helping reduce manual regression effort and catch defects earlier in the release cycle.

Full Stack Intern | Light & Wonder (LNW India Solutions Pvt Ltd) Mar 2023 - Jul 2023

- Completed a 16-week full stack internship focused on C#/.NET, Angular, REST API development, database-backed application logic, debugging, and production-oriented software delivery.
- Designed and developed a Game Recommendation System with user feedback and rating functionality, converting requirements into Angular screens, backend endpoints, and persistent data workflows.
- Built reusable UI components, form flows, and API integration logic while following component-based frontend design, validation handling, and clean separation between presentation and service layers.
- Implemented backend service logic for recommendation, feedback, and rating use cases, strengthening understanding of layered architecture, request/response models, and database operations.
- Participated in code reviews, sprint discussions, bug fixing, and testing activities, gaining practical exposure to enterprise development practices and Agile collaboration.

PROJECTS

Medha - Production Go Backend with Clean Architecture

Go · Chi · PostgreSQL/PostGIS · Redis Pub/Sub · MinIO · Docker Compose · GitHub Actions · Cloudflare Tunnels · Nginx

- Engineered a clean-architecture REST API in Go using a Handler-Service-Repository structure, separating transport, business logic, and persistence layers for maintainable backend development.
- Designed secure identity workflows including OTP validation, third-party OAuth, asymmetric RS256 JWT token rotation, and cryptographically hashed refresh-token storage.
- Built a full-duplex WebSocket messaging engine with a custom JSON envelope protocol and Redis Pub/Sub synchronization across clustered server nodes.
- Implemented geospatial proximity discovery using PostGIS GiST indexing and ST_DWithin geofencing for location-based matching and discovery workflows.
- Developed a media upload pipeline using MinIO, short-lived presigned uploads, and a custom Nginx/Go reverse proxy for secure asset delivery.
- Set up Docker Compose environment separation and GitHub Actions CI/CD with linting and verification gates, deployed through Cloudflare Tunnels on a Linux host.

Java & Spring Boot REST Service

- Developed a RESTful web service in Spring Boot using Controller-Service-Repository layering, Spring Data JPA/Hibernate, DTO-style request handling, and standard OOP principles.

EDUCATION

Bachelor of Engineering in Computer Science

Jul 2019 - Jul 2023

Siddaganga Institute of Technology, Tumakuru, Karnataka | CGPA: 8.65 / 10
